### THE VALUE OF SILENCE.

Too Much Talking as the Cause of Failures.

Many of the failures in business and professional as well as social life are due to injudicious talking. A young man of apparently very moderate ability has recently astonished his fellow workers by his noticeable success in business. "Pure luck" it has been called, but a policy or natural habit of silence is the real cause.

In his first position he succeeded a man of long experience and excellent judgment, a circumstance that made his youth and inexperience conspicuous by contrast. He made no apologies and asked little advice. He was courteous to his superiors, considerate of his business inferiors, but absolutely deaf to all the gossip and irresponsible talk so prevalent in every large business office. He had held his position for a year, gossip had it that he had failed, for at that time he had not suggested a single innovation or enlarged his department in any way. But soon it became known that he had proposed a change that would result in an annual saving of \$2,000. Gradually his step became firmer, his manner more assured, and he no longer outstayed the janitor at night. Slowly but surely he gained the confidence of the general manager and the heads of other departments, and it soon became their habit to come to him for advice. At the end of five years, when his former associates were wondering if they could afford to get married, he was admitted to membership in the firm.

In every establishment where a number of persons are employed there is always an undercurrent of gossip. A dissatisfied stenographer talks her troubles over with a bookkeeper. The bookkeeper confides to the telephone operator that he expects to get an increase in salary. The elevator boy explains that he is going to leave soon for a better job. These bits of news are exchanged until they become common property.

The employer learning that the stenographer is dissatisfied, tells her that she may leave at her pleasure. The bookkeeper fails to get his increase in salary and the elevator boy does not get his "new job." Especially if you are dissatisfied should you refrain from discussing your position.—Youth's Companion.

## IN WAYS THAT COUNT

When you buy your clothes here you get clothes that are not only right in the big ways, but you get clothes made right in the small ways—the little details that mean so much when the real test of hard wear brings out the weak spots.

So much may be omitted from a suit without showing on the surface, that it is almost impossible for the average man to detect these faults. Here is where
